

Installation Of Biometrics In Panchayati Raj Office

Brihaspathi Technologies has made a new installation of 20 “Cloud based Biometrics Time&Attendance system” in panchayati Raj at Chittoor.

APPSC Panchayat Raj Secretary

Panchayati Raj is a Government organization which implements various poverty alleviation and infrastructure development schemes for social and economic development of rural people. In every Panchayati Raj office there will be Section Engineer, Executive Engineer and Division Engineer.

The Section Engineer will Monitor all the Executive Engineer and Division Engineer of Chittoor, Thirupathi and madanapalle. Executive Engineers of all the districts will monitor the Division Engineer of their respective regions. The complete monitor will be seen at Chittoor.

The software used in our cloud based biometric device are indigenous developed by our software team. The fingerprint access with the biometric device shows whether the entry is genuine or not. If the entry is from the genuine person the data is verified and sent to the web service. The data of the user is sent to the Simple Object Access Protocol (SOAP) using GPRS or wi-fi. Finally the data settles and it is stored at cloud server.

It is used for keep view of problems in maintaining their employees record. By using this cloud based technology its very easy to monitor and control things regarding attendance of his staff from anywhere in the globe through internet.
