

Wireless Security Project At Kompally Ashoka Builders Construction Site

We Brihaspathi Technologies Pvt Ltd, has Installed 15 Cameras in Ashoka Builders Construction site at Kompally. It is an construction site of villas.

The surveillance cameras are installed in different places of the site to ensure the security of the employees, Visitors and to keep watch on the Infrastructure. Our technicians have placed right cameras at right places.

Here,we installed 3MP outdoor Dome cameras, Bullet cameras and 2MP PTZ cameras.The PTZ camera covers more distance and it contains zooming natures. The bullet camera covers specific location clearly. Dome cameras are weather resistant.

Each of the CCTV cameras has best features. Each has its own purpose and has many designs to fulfill different requirements. The cameras are weather proof and can capture the moments at the time of hazards and natural disasters.

The complete view of construction site Can be Monitor through Mobile app. The site office is 3km far from the construction site. The wireless radio is connected at the construction site office. Because, of vehicle transportation the cabling connection may be disturbed. So, to avoid these situations we placed Wireless Radio's. Cameras which are installed around the site have point-to-point access. Entire set of NVR, Radio and cameras connected through the switch at site office.
