

Installation of Fisheye Cameras in CtrlS

Brihaspathi Technologies has made a new installation of fisheye cameras in CtrlS, a tier-4 Data Centre. Our company has installed the fisheye IP secured camera in Ctrl S in its Mumbai branch.

CtrlS belongs to the IT industry. It deals with large group of networked computer servers that are used by various firms for remote storage, processing, and distribution of large sum of data. The company has taken a step forward by installing the fisheye camera in their company for the purpose of surveillance.

A fisheye lens is a wide-angle lens that produces strong visual curves intended to create a broad panoramic view. These lenses achieve extensively wide angles of image. The fish eye camera that is installed by Brihaspathi technologies Pvt. Ltd. in CtrlS covers 360 degrees with the camera being standard at a place. The whole process of installation of the fisheye camera is completed in less than a day. It shows the working efficiency of our technicians.

Brihaspathi Technologies is proving its ability in providing best of the surveillance solutions in Hyderabad and beyond. The company is now focusing on its expansion in vizag and Bangalore. It has proved its ability in installing various types of cameras at many locations in Hyderabad, Kurnool and Vijayawada.

Brihaspathi Technologies centre of interest is not only on supplying the CCTV cameras but also in installing them at desired locations of the clients and we also provide you with a good knowledge on how to use it for a long time. Our technicians are so good in installing the CCTV cameras that they take least possible time. We have best price rates for the wide range of CCTV cameras available in our company.
