Support Desk Management System

Support Desk Management System

With clients and customers increasingly availing our Security and Surveillance solutions, there has evolved the need for establishing a prompt and responsive Support Desk Management. The Support Desk Management developed in-house, features a robust and dynamic responsive system. Customer queries and issues are channeled to the concerned for prompt action and management.

Brihaspathi Technologies offers the best-in-the-class Security and Surveillance equipment to individual homes, apartment complexes, commercial centres, banks and public institutions. We deal in planning, customizing, installing and maintaining of the security and surveillance equipment. Our security and surveillance equipment primarily includes CCTV cameras and servers that need to be installed and maintained by experts.

Our Support Desk Management helps our clients to address all issues concerning security and surveillance equipment, to ensure that they work efficiently.

For your precious time and your attention.
